

## TELESTAIR telescopic ladder

Certified as to EN 1147 „portable ladders for fire fighters“

The **ROSENBAUER telescopic ladder TELESTAIR** is very versatile and extremely simple to use. All rungs can be used at

a maximum height of 4.10 m, however, the ladder can also be employed with any intermediate length.

**Safety System:**

- Hands and fingers are protected against injury when the ladder is slid together
- Safety gap: approx. 40 mm

**Essential advantages:**

- 2-person-rescue ladder according to EN 1147
- Anodized rungs and stringers, rung holders of red, fiberglass-reinforced synthetic material, anti-slip rubber feet at lower end, rubber caps at tip
- Ideal for small and fast vehicles, command cars and first responder because of its very small transport dimensions (900 x 520 x 105 mm):
- will fit in any tank or compartment
- Universally deployable, for example in narrow stairwells during inside fire attacks, accidents involving buses, trains or trucks, and for reconnaissance and rescue operations

**Data:**

Number of rungs	13
<b>Dimensions and weight:</b>	
Transport dimensions	900 x 520 x 105 mm
Rung spacing	300 mm
Max. functional height	4100 mm
Intermediate height	900 bis 4100 mm
Transport length	900 mm
Weight	15 kg

**Order Data:**

Order Number	<b>80112802</b>
